

# SUPERIOR CALCIUM SULPHUR EXTRA E

**Macro-mineral, trace element and vitamin loose lick for supplementation of sheep during the dry season.**

## SUITABILITY

All classes of sheep when green feed is unavailable.  
Grazing dry feed, crop residues or pasture. Trail feeding or confinement feeding.

## FEATURES

Comprehensive range of macro-minerals, trace elements and vitamins  
**Supplies 2-4g Vitamin E over 42 days at target intake of 30-60g/head/day**  
High levels of calcium, sulphur and sodium

## BENEFITS

Supplies macro-minerals to complement pastures, stubbles or grain-based diets  
Supplies essential trace elements and vitamins  
Helps build ewe body reserves of calcium to reduce risk of hypo-calcaemia  
Supports foetal development  
Safe for access by all livestock species

## SPECIFICATIONS

Calcium	Ca	23.0%	Iodine	I	4mg/kg
Phosphorus	P	0.1%	Chromium	Cr	1.6mg/kg
Magnesium	Mg	0.5%	Molybdenum	Mo	4mg/kg
Sulphur	S	2.7%	Vitamin A		40KIU/kg
Copper	Cu	40mg/kg	Vitamin D3		8KIU/kg
Cobalt	Co	4mg/kg	Vitamin E		1630mg/kg
Selenium	Se	4mg/kg	Vitamin B1		24mg/kg
Zinc	Zn	640mg/kg	Molasses		3%
Manganese	Mn	320mg/kg	Salt		24%
Ferrous Iron	Fe	240mg/kg			

## DIRECTIONS FOR USE

Introduce prior to anticipated peak requirement  
Pour into free draining containers and allow ad-lib access  
Allow one lick station per 50-100 head  
Ensure continuous access once supplementation has commenced  
Intake may exceed target level until craving for minerals is satisfied  
Target intake: 30-60g/head/day  
Can be added to grain supplements at the rate of 2.5%

## PRESENTATION

25kg bag, 1mt bulka bag

## DISCLAIMER

Introduce or modify high grain rations gradually to facilitate adaptation  
Ensure ad-lib access to fresh clean water
