

# SUPERIOR FEEDLOT MINERALS

PLUS RUMENSIN® AND YEA-SACC®

**A high specification macro-mineral, trace element and vitamin concentrate plus Rumensin® and Yea-Sacc® for feedlot cattle.**

## SUITABILITY

Cattle finishing in confinement or grazing pasture  
Lot feeding or supplementation with high grain rations

## FEATURES

High specification ingredients  
High bio-availability  
Comprehensive range of macro-minerals, trace elements and vitamins  
Rumensin®  
Yea-Sacc®

## BENEFITS

Balances high grain rations formulated with typical WA ingredients  
Supplies essential trace elements and vitamins  
Improved feed intake pattern, Feed Conversion Efficiency and growth rate  
Live yeast assists rumen function, stability and health  
Reduced risk of coccidiosis, digestive disorders, acidosis and bloat  
Supports the immune system resulting in healthier cattle

## SPECIFICATIONS

Calcium	Ca	22.0%	Chromium	Cr	16mg/kg
Phosphorus	P	1.0%	Vitamin A		200KIU/kg
Magnesium	Mg	3.7%	Vitamin D3		40KIU/kg
Sulphur	S	2.3%	Vitamin E		1000mg/kg
Copper	Cu	600mg/kg	Vitamin B1		120mg/kg
Cobalt	Co	20mg/kg	Molasses		3%
Selenium	Se	20mg/kg	Salt		15%
Zinc	Zn	1600mg/kg	Monensin		1000mg/kg
Manganese	Mn	1600mg/kg	Yea-Sacc®		20g/kg
Ferrous Iron	Fe	1200mg/kg			
Iodine	I	20mg/kg			

## DIRECTIONS FOR USE

Add 25kg/mt of prepared feed.  
Ensure thorough mixing of ingredients  
Introduce grain feeding gradually over 14-21 days  
Customised ration formulation available on request

## PRESENTATION

25kg bag, 1mt bulka bag

## DISCLAIMER

**Do not allow access by non-target species to products containing Monensin**  
Introduce or modify high grain rations gradually to facilitate adaptation  
Ensure ad-lib access to fresh clean water
